

Anton Dorovskikh

Full Stack (Automation & Manual) QA Engineer

Telegram: [antondorovs](#) | antondorovs@gmail.com | antondorovs.com

Location: Montenegro | Citizenship: Russian Federation | Age: 36

Employment: Full-time | Work format: Remote

Expected salary: from 2500 USD net

I am a full stack QA Engineer with solid commercial experience in manual and automated testing of frontend, backend, web, and mobile applications. I specialize in functional, integration, system, and regression testing.

I have experience working both on a large fintech project and in a startup environment. I believe testing should not be done just for the sake of testing, but should really improve product quality and usability.

I continue developing my skills in test automation and programming. I also train and mentor new QA specialists. I have strong communication skills, high motivation, a strong sense of responsibility, and leadership experience.

Work Experience (4+ years in QA)

Full Stack QA Engineer | UNI digital logistics | Aug 2024 to Present

Development of the seller platform unitrade-global.com from scratch for parcel management.

Tech stack

JavaScript, TypeScript, Playwright, REST API, Postman, Swagger, DevTools, PostgreSQL, SQL, Kafka, Kubernetes, Kibana, Elasticsearch, Charles Proxy, MongoDB, CI/CD, GitLab CI, BrowserStack, Figma, Sketch, Azure, Yandex Wiki, Scrum, Kanban.

Achievements

- Introduced automated testing, which helped make the release process faster and improve product quality.
- Organized the onboarding and training process for new team members.
- During my work on the project, production releases were stable and did not require rollbacks.

Responsibilities

- Performed different types of frontend and backend testing.
- Automated API regression tests and also worked on UI test automation.
- Tested the mobile application in WeChat.
- Tested REST APIs using Postman and Swagger and prepared the full test environment.
- Analyzed logs and monitored system behavior using Kibana and Elasticsearch.

Manual QA Engineer | Workme LTD - VTB | May 2022 – Aug 2024

VTB Bank's Cash Logistics project by workme.io for automating cash collection logistics and forecasting ATM servicing.

Tech stack

REST API, DevTools, Postman, Swagger, PostgreSQL, OpenShift, Apache Kafka, Kubernetes, Docker, MongoDB, Redis, CI/CD, GitHub Actions, Jenkins, Kibana, Elasticsearch, Jira, Confluence, TestRail, Scrum.

Achievements

- Tested integrations that helped automate logistics planning based on ATM load forecasts, routes, and weather conditions.
- Found critical errors in route calculations, which helped prevent problems in real cash collection operations.
- Organized the release plan and testing process for 3 products.
- Improved the API testing process and reduced manual testing time from two days to one day per release.

Responsibilities

- Tested modules for ATM load forecasting and building optimal routes.
- Tested API integrations between Forecast and Optimizer modules and integrations with external map and weather services.
- Analyzed logs in Kibana and reproduced bugs using mocks.
- Tested reports and logistics cost calculation scenarios.
- Checked that business logic matched the bank's internal requirements.
- Created, maintained, and updated test documentation.

Education & Courses

2024 to 2025 | **Automation QA Engineer** | Quality Academy.

2023 to 2024 | **Full Stack JavaScript Developer** | Elbrus Bootcamp.

2021 to 2022 | **Manual QA Engineer** | Quality Academy.

2020 to present | **English courses** | SkyEng, Duolingo, LinguaTrip.

2008 to 2015 | **Bauman Moscow State Technical University** | Faculty of Radio Engineering | Design and Production Technology of Radio Electronic Devices | GPA: 4.05.

Skills & Tools

REST API, JSON, SOAP, XML, HTML, CSS, JavaScript, TypeScript, Playwright, SQL, Apache Kafka, Kubernetes, OpenShift, DevTools, Postman, Swagger, PostgreSQL, PgAdmin, Lens, Docker, Mongo DB, Redis, JetBrains Rider, WebStorm, VS Code, Kibana, Elasticsearch, BrowserStack, Charles Proxy, Fiddler, TestFlight, Xcode, Android Studio, CI/CD, GitHub Actions, GitLab CI, Jenkins, Figma, Sketch, Miro, Testrail, Azure, Яндекс Вики, Jira, Confluence, Agile, Scrum, Kanban. Languages: Russian C2, English B2, Serbian B1.
