

Anton Dorovskikh

Full Stack (Automation & Manual) QA Engineer

Telegram: [antondorovs](#) | antondorovs@gmail.com | +382 68 636 517

Location: Montenegro | Citizenship: Russian Federation | Age: 35 y.o.

Employment: Full-time | Work format: Remote

Expected salary: 2300 USD net

Full stack QA engineer with extensive commercial experience in manual and automated testing of frontend, backend, web, and mobile applications. Specialized in functional, integration, system and regression testing.

Experience working both in large fintech projects and in startup environments. I believe in testing not just as a process, but as way to genuinely improve product quality and usability. Continuously developing my skills in test automation and programming.

Also involved in onboarding and mentoring new team members. Strong communication skills, high motivation, a sense of responsibility, and experience in leadership roles.

Work Experience (5 years in QA)

Manual QA Engineer | UNI digital logistics | Aug 2024 – Present

Seller platform unitrade-global.com for parcel and returns management.

Tech stack

REST API, DevTools, Postman, Swagger, SQL, Kafka, Rider, Kubernetes, Lens, Charles Proxy, MongoDB, Kibana, Elasticsearch, BrowserStack, Figma, Sketch, Azure, Yandex Wiki, Scrum, Kanban.

Achievements

- Identified critical defects in backend logic, preventing errors in order and returns processing.
- Ensured stable production releases without rollbacks.
- Organized onboarding and training process for new team members.

Responsibilities

- Performed comprehensive frontend and backend testing of the application.
- Tested mobile application within WeChat using Charles Proxy.
- Tested REST APIs using Postman and Swagger, setup of the full test environment.
- Analyzed logs and monitored system behavior using Kibana and Elasticsearch.
- Maintained and updated test documentation and test artifacts.

Full Stack QA Engineer | Ultimate Software DOO | May 2023 – Aug 2024

Applications ultie.org and ultisport.ru for sports event management.

Tech stack

REST API, DevTools, Postman, Swagger, PostgreSQL, PgAdmin, JS, Playwright, WebStorm, CI/CD, GitLab CI, Jenkins, Kibana, Elastic, BrowserStack, Figma, Jira, Confluence, TestRail, Kanban.

Achievements

- Introduced automated testing, improving release cycle speed and overall product quality.
- Organized onboarding and training process for new team members.

Responsibilities

- Performed comprehensive frontend and backend testing.
- Developed automated tests for API and UI (Playwright).
- Tested REST APIs using Postman and Swagger, working with JSON data.
- Analyzed logs and monitored system behavior using Kibana and Elasticsearch.
- Maintained and updated test documentation and test artifacts.

Manual QA Engineer | Workme LTD - VTB | Oct 2021 – May 2023

Cash Logistics project by workme.io for VTB Bank, focused on automating cash collection logistics and ATM service forecasting.

Tech stack

REST API, DevTools, Postman, Swagger, PostgreSQL, OpenShift, Apache Kafka, Kubernetes, Docker, MongoDB, Redis, CI/CD, GitHub Actions, Jenkins, Kibana, Elastic, Jira, Confluence, TestRail, Scrum.

Achievements

- Tested integrations that enabled automated logistics planning based on ATM load forecasting, routing, and weather conditions.
- Identified critical errors in route calculation logic, preventing failures in real-world cash collection operations.
- Organized release rollout process and testing activities (PMI/PSI) for 3 products.

Responsibilities

- Tested modules for ATM load forecasting and route optimization.
- Verified API integrations between Forecast and Optimizer services, as well as with external services (maps and weather APIs).
- Analyzed logs using Kibana and reproduced issues using mocks.
- Tested reports and logistics cost calculation scenarios.
- Validated business logic against internal bank requirements.
